Comprehensive Training Policy for Technical Teachers

Today the profession of Engineering teaching has become quite challenging Engineering teachers are expected to be both effective teachers and researchers. A teacher can “teach” all day long and cover an extensive amount of material, but if students haven’t learnt the material, the exercise is an enormous waste of time and energy. Being an educator is not just about sharing knowledge; it is about making sure that learners truly integrate this knowledge and derive learning out of it. Any teaching that does not result in effective learning is worthless. Therefore, to be an effective teacher, one needs to be able to deliver the domain knowledge using the most suitable pedagogical tools. An effective teacher is also required to remain at the frontiers of knowledge in his/her areas of subject expertise. For this, every teacher needs to continuously upgrade oneself by engaging in research. With this unique vision **B.N. College of Engineering & Technology, Bakshi ka Talab, Sitapur Road, Lucknow (BNCET)** has established staff training college in the year 2008.

OBJECTIVES:

- To facilitate the faculty to attend the Faculty Development Program (FDP) for develop an appreciation for the teachers training in view of changing roles and responsibilities of engineering in the 21st century.
- Understand the significance of alignment amongst the fundamental elements of effective teaching and learning.
- Be able to describe and choose from the signature pedagogies used in engineering education.
- Encouraging, supportive and humane facilitator in teaching learning situations who enables learners (students) to discover their talents, to realize their physical and intellectual potentialities to the fullest, to develop character and describe social and human values to function as responsible citizens.
