JAN 2020 – JUN 2020

DR. PANKAJ VERMA
HEAD OF DEPARTMENT

DR. RISHI KUMAR VERMA
CHIEF EDITOR

1. Vision of Institute

Strive to develop as an institution of excellence in professional and technical education that enables youth to be innovative with inherent morality and skills, to be a valuable asset for society and Nation.

2. Mission of Institute

To produce innovative and technically strong professionals with adequate knowledge, skills and attitude to make them capable of facing challenges in all spheres of life.

Impart excellent environment for development of professional skills by providing quality education, extra-curricular activities and creating ethical culture to benefit society and industry.

3. Vision of Department

To produce quality Biotech engineers tailored to promote innovation and dissemination of knowledge in order to benefit the environment and country as well as to gain excellence in various spheres of Biotechnology fortified to create graduates who endeavor societal welfare.

4. Mission of Department

M1. To incubate innovative ideas at innovations hubs and center of excellences to design and develop products/applications followed by their up scaling and industrial tie up.

M2. To integrate the traditional and modern Biotechnology and educate students how they can provide benefits to industry, society and country by upgrading their skills with the help of state-of-the-art research labs and nurtured academia.

M3. To participate in various academic/sports/social activities to develop their interpersonal skills of communication, team work and also learn moral/ethical practices.

5. About the Department

The sole vision of Department of Biotechnology is to produce good engineers with human values and Indian ethos. Here in our department, which has a center of excellence, we taught technology, science & human values side by side. Skill & knowledge relevant to real world problem are inseminated to produce dynamic, socially conscious, sensitive human beings.

We focus on holistic development of the students by a combination of both curricular and extracurricular activities. We believe that to develop a tender mind we need to go beyond class room teaching, realizing this we help to make the students industry ready. Department of Biotechnology, BNCET has framed the departmental activities and the curriculum to produce technically skilled engineers to compete with the growing pace. Thus, we regularly organize conferences, seminars, workshops, expert lectures and industrial visits on regular basis.

6. Salient Features of Department

The Department has well equipped labs and trained lab instructors to help students in practicals. We also have tie ups with various government and private research labs. Lucknow city have different CSIR labs and we take maximum advantages of this. Eminent scientific persons pay their regular visits to interact with our students and make them aware with latest technological advances in their respective field. Private research labs having advance set up of instruments allow our students for hands on training and give live demonstration. Apart from that we have separate research oriented labs for final year students to complete their project work. This research oriented work lead towards peer reviewed publications. We also motivate our students to showcase their research work in different national and international conferences.

7. PEOs of Department

- PEO1.** To translate Biotechnological principles into practical applications by promoting multidisciplinary research in house with collaborating government or private research labs.
- PEO2.** To enrich abilities for understanding, learning and adopting any new technology which is helpful in updating their pre-existing skill sets towards benefits of all stakeholders.
- PEO3.** To develop confidence of speaking at mass level, presentation of ideas and skill to discuss any scientific issue with scholars and laureates.

8. PSOs of Department

- PSO1.** Able to design protocols for synthesizing any product, downstream processing including quality control which can be easily scaled up fulfilling market expectations.
- PSO2.** Learn various concepts, principles, methodologies and precautions of different tools & techniques covering every aspect of Biotechnology domain used in research labs as well as industry level.
- PSO3.** Learn necessary ethics required for enhancement of academic and industrial practices with societal awareness which help in higher education and professional life.

10. Department Activities

i. Environment Day

The main idea behind marking June 5 as World Environment Day is so that we are aware of what is needed to be done to protect our environment. The day raises awareness about

the environmental issues like global warming, marine pollution, human over-population, protection of wildlife, and sustainable consumption. It has spread so far and wide, that this day has become a global platform for countries to reach out to the public. For 2020, the theme for World Environment Day is ‘Celebrate Biodiversity’, which, as per the United Nations, a concern that is both urgent and existential. Citing the recent events taking place in Brazil, the US, Australia, Africa and the global COVID-19 pandemic, it said it all demonstrates the interdependence of humans and the webs of life, in which they exist. This year students planted many saplings at their homes and nearby places.

A small program about plantation also occurs at campus where head of the departments along with the director general and director planted few saplings inside the campus.

ii. International Day of Yoga

Yoga is an invaluable gift of ancient Indian tradition. It embodies unity of mind and body; thought and action; restraint and fulfillment; harmony between man and nature and a holistic approach to health and well-being. Yoga is not about exercise but to discover the sense of oneness with ourselves, the world and Nature. By changing our lifestyle and creating consciousness, it can help us to deal with climate change. Yoga is essentially a spiritual discipline based on an extremely subtle science which focuses on bringing harmony between mind and body. It is an art and science for healthy living.

This year theme of IDY 2020 was Yoga @ Home and Yoga with family to promote yoga inside the home and preventing any short of gathering. Institute organized yoga session on zoom meetings and streamed it live on Facebook. Around 40 students along with faculty members participated in live zoom session and learnt the importance of yoga and meditation in life.

21. Future Plans of Department

Since, COVID-19 pandemics seriously affected the academics of last semester thus we need to work hard and get more plans for students so that they can recover the lagging activities.

- ❖ Online webinars will be scheduled to make students updated.
- ❖ Industrial visits and research lab visits will be scheduled as per the then situation of COVID-19.
- ❖ Focus on virtual labs will be more comparative to hands on experiments.
- ❖ Placements of students will be rescheduled and unorthodox areas of job will be searched.
- ❖ Constructively focus on entrepreneurship and promote students for startups.
